

## TABLE OF CONTENTS

	<u>Page</u>
<b>Foreword</b> .....	i
<b>Acknowledgments</b> .....	ii
<b>Executive Summary</b> .....	iii
 <b>Chapter 1. Introduction and Purpose</b>	
1.1 Background .....	1-1
1.2 Overview of Wisconsin's <i>Strategy</i> .....	1-3
1.3 The Results and Benefits of Wisconsin's <i>Strategy</i> .....	1-4
 <b>Chapter 2. Approach and Methods</b>	
2.1 Organizational Structure .....	2-1
2.2 Ecological Framework.....	2-5
2.2.1 Overview of the Ecological Landscapes of Wisconsin .....	2-5
2.2.2 Overview of the Natural Communities in Wisconsin .....	2-6
2.2.3 Ecological Landscape Descriptions .....	2-7
2.2.3.1 Superior Coastal Plain Ecological Landscape.....	2-11
2.2.3.2 Northwest Lowlands Ecological Landscape .....	2-14
2.2.3.3 Northwest Sands Ecological Landscape.....	2-17
2.2.3.4 North Central Forest Ecological Landscape .....	2-19
2.2.3.5 Northern Highlands Ecological Landscape .....	2-22
2.2.3.6 Forest Transition Ecological Landscape.....	2-24
2.2.3.7 Northeast Sands Ecological Landscape.....	2-27
2.2.3.8 Northern Lake Michigan Coastal Ecological Landscape .....	2-29
2.2.3.9 Central Lake Michigan Coastal Ecological Landscape.....	2-32
2.2.3.10 Western Prairie Ecological Landscape .....	2-35
2.2.3.11 Western Coulee and Ridges Ecological Landscape .....	2-37
2.2.3.12 Southwest Savanna Ecological Landscape .....	2-40
2.2.3.13 Central Sand Plains Ecological Landscape .....	2-43
2.2.3.14 Central Sand Hills Ecological Landscape.....	2-46
2.2.3.15 Southeast Glacial Plains Ecological Landscape .....	2-49
2.2.3.16 Southern Lake Michigan Coastal Ecological Landscape .....	2-52
2.3 Methodology for Determining Species of Greatest Conservation Need.....	2-55
2.3.1 Methodology for Determining Vertebrate Species of Greatest Conservation Need .....	2-56
2.3.1.1 General Introduction .....	2-56
2.3.1.2 Method Used to Identify Vertebrate Species of Greatest Conservation Need in Wisconsin .....	2-56
2.3.1.3 Selected Method for Categorizing Vertebrate Species of Greatest Conservation Need in Wisconsin .....	2-61

	<u>Page</u>
2.3.1.4 Vertebrate Species Not Identified as Vertebrate Species of Greatest Conservation Need in Wisconsin.....	2-62
2.3.2 Methodology for Determining Invertebrate Species of Greatest Conservation Need .....	2-65
2.3.2.1 General Introduction .....	2-65
2.3.2.2 State of Scientific Knowledge and Process Used to Identify Invertebrate Species of Greatest Conservation Need.....	2-65
2.3.2.3 Invertebrate Taxa Considered/Not Considered in the Current <i>Strategy</i> .....	2-70
2.3.2.4 Important Invertebrate Data Sources .....	2-71
2.3.2.5 Categorizing Invertebrate Species of Greatest Conservation Need.....	2-72
2.3.2.6 Rationale for Inclusion of Invertebrate Species as Species of Greatest Conservation Need.....	2-74
2.4 Methodology for Identifying Habitat Associations of Species of Greatest Conservation Need.....	2-80
2.5 Methodology for Identifying Habitat and Species Threats, Issues, and Conservation Actions .....	2-85

### **Chapter 3. Vertebrate Species of Greatest Conservation Need: Assessments and Conservation Strategies**

3.1 Vertebrate Species of Greatest Conservation Need.....	3-1
3.1.1 Description of Vertebrate Species Summaries .....	3-3
3.1.1.1 Species Ranking Criteria Scores.....	3-3
3.1.1.2 Ecological Landscape Association Scores.....	3-6
3.1.1.3 Landscape-community Combinations of Highest Ecological Priority.....	3-7
3.1.1.4 Threats, Issues, and Priority Conservation Actions .....	3-7
3.1.2 Bird Species of Greatest Conservation Need .....	3-9
3.1.2.1 Overview .....	3-9
3.1.2.2 General Threats, Issues and Conservation Actions.....	3-11
3.1.2.3 Individual Bird Species of Greatest Conservation Need Summaries.....	3-15
3.1.3 Fish Species of Greatest Conservation Need.....	3-172
3.1.3.1 Overview .....	3-172
3.1.3.2 General Threats, Issues and Conservation Actions.....	3-173
3.1.3.3 Individual Fish Species of Greatest Conservation Need Summaries.....	3-175
3.1.4 Herptile Species of Greatest Conservation Need.....	3-217
3.1.4.1 Overview .....	3-217
3.1.4.2 General Threats, Issues and Conservation Actions.....	3-217
3.1.4.3 Individual Herptile Species of Greatest Conservation Need Summaries .....	3-222
3.1.5 Mammal Species of Greatest Conservation Need.....	3-269
3.1.5.1 Overview .....	3-269
3.1.5.2 General Threats, Issues and Conservation Actions.....	3-269
3.1.5.3 Individual Mammal Species of Greatest Conservation Need Summaries .....	3-274
3.2 Vertebrate Species of Greatest Conservation Need by Ecological Landscape .....	3-303
3.2.1 Vertebrate Species of Greatest Conservation Need occurring in each Ecological Landscape.....	3-303

	<u>Page</u>
3.2.2 Ecological Priorities within each Ecological Landscape .....	3-324
3.3 Natural Communities Associated with Vertebrate Species of Greatest Conservation Need: Opportunities, Threats, and Conservation Actions.....	3-385
3.3.1 Aquatic Group .....	3-395
3.3.1.1 Coldwater Streams .....	3-397
3.3.1.1.1 Community Overview.....	3-397
3.3.1.1.2 Vertebrate Species of Greatest Conservation Need Associated with Coldwater Streams.....	3-397
3.3.1.1.3 Threats and Priority Conservation Actions for Coldwater Streams .....	3-402
3.3.1.2 Coolwater Streams.....	3-403
3.3.1.2.1 Community Overview.....	3-403
3.3.1.2.2 Vertebrate Species of Greatest Conservation Need Associated with Coldwater Streams.....	3-403
3.3.1.2.3 Threats and Priority Conservation Actions for Coolwater Streams .....	3-408
3.3.1.3 Impoundments/Reservoirs .....	3-409
3.3.1.3.1 Community Overview.....	3-409
3.3.1.3.2 Vertebrate Species of Greatest Conservation Need Associated with Impoundments/Reservoirs .....	3-409
3.3.1.3.3 Threats and Priority Conservation Actions for Impoundments/Reservoirs .....	3-415
3.3.1.4 Inland Lakes.....	3-416
3.3.1.4.1 Community Overview.....	3-416
3.3.1.4.2 Vertebrate Species of Greatest Conservation Need Associated with Inland Lakes.....	3-417
3.3.1.4.3 Threats and Priority Conservation Actions for Inland Lakes.....	3-423
3.3.1.5 Lake Michigan.....	3-424
3.3.1.5.1 Community Overview.....	3-424
3.3.1.5.2 Vertebrate Species of Greatest Conservation Need Associated with Lake Michigan .....	3-424
3.3.1.5.3 Threats and Priority Conservation Actions for Lake Michigan ..	3-429
3.3.1.6 Lake Superior .....	3-430
3.3.1.6.1 Community Overview.....	3-430
3.3.1.6.2 Vertebrate Species of Greatest Conservation Need Associated with Lake Superior .....	3-430
3.3.1.6.3 Threats and Priority Conservation Actions for Lake Superior ....	3-435
3.3.1.7 Warmwater Rivers.....	3-436
3.3.1.7.1 Community Overview.....	3-436
3.3.1.7.2 Vertebrate Species of Greatest Conservation Need Associated with Warmwater Rivers.....	3-436
3.3.1.7.3 Threats and Priority Conservation Actions for Warmwater Rivers .....	3-441
3.3.1.8 Warmwater Streams.....	3-442
3.3.1.8.1 Community Overview.....	3-442

	<u>Page</u>
3.3.1.8.2 Vertebrate Species of Greatest Conservation Need Associated with Warmwater Streams.....	3-442
3.3.1.8.3 Threats and Priority Conservation Actions for Warmwater Streams .....	3-448
3.3.2 Barrens Group.....	3-449
3.3.2.1 Great Lakes Barrens.....	3-451
3.3.2.1.1 Community Overview.....	3-451
3.3.2.1.2 Vertebrate Species of Greatest Conservation Need Associated with Great Lakes Barrens .....	3-451
3.3.2.1.3 Threats and Priority Conservation Actions for Great Lakes Barrens .....	3-455
3.3.2.2 Oak Barrens .....	3-457
3.3.2.2.1 Community Overview.....	3-457
3.3.2.2.2 Vertebrate Species of Greatest Conservation Need Associated with Oak Barrens .....	3-457
3.3.2.2.3 Threats and Priority Conservation Actions for Oak Barrens .....	3-463
3.3.2.3 Pine Barrens .....	3-466
3.3.2.3.1 Community Overview.....	3-466
3.3.2.3.2 Vertebrate Species of Greatest Conservation Need Associated with Pine Barrens.....	3-466
3.3.2.3.3 Threats and Priority Conservation Actions for Pine Barrens.....	3-471
3.3.3 Grassland Group .....	3-474
3.3.3.1 Bracken Grassland .....	3-475
3.3.3.1.1 Community Overview.....	3-475
3.3.3.1.2 Vertebrate Species of Greatest Conservation Need Associated with Bracken Grassland.....	3-475
3.3.3.1.3 Threats and Priority Conservation Actions for Bracken Grassland .....	3-480
3.3.3.2 Dry Prairie .....	3-482
3.3.3.2.1 Community Overview.....	3-482
3.3.3.2.2 Vertebrate Species of Greatest Conservation Need Associated with Dry Prairie .....	3-482
3.3.3.2.3 Threats and Priority Conservation Actions for Dry Prairie .....	3-488
3.3.3.3 Dry-Mesic Prairie .....	3-491
3.3.3.3.1 Community Overview.....	3-491
3.3.3.3.2 Vertebrate Species of Greatest Conservation Need Associated with Dry-Mesic Prairie .....	3-491
3.3.3.3.3 Threats and Priority Conservation Actions for Dry-Mesic Prairie .....	3-497
3.3.3.4 Mesic Prairie .....	3-500
3.3.3.4.1 Community Overview.....	3-500
3.3.3.4.2 Vertebrate Species of Greatest Conservation Need Associated with Mesic Prairie .....	3-500
3.3.3.4.3 Threats and Priority Conservation Actions for Mesic Prairie .....	3-505
3.3.3.5 Sand Prairie .....	3-508

	<u>Page</u>
3.3.3.5.1 Community Overview.....	3-508
3.3.3.5.2 Vertebrate Species of Greatest Conservation Need Associated with Sand Prairie.....	3-508
3.3.3.5.3 Threats and Priority Conservation Actions for Sand Prairie .....	3-513
3.3.3.6 Wet Prairie .....	3-515
3.3.3.6.1 Community Overview.....	3-515
3.3.3.6.2 Vertebrate Species of Greatest Conservation Need Associated with Wet Prairie .....	3-515
3.3.3.6.3 Threats and Priority Conservation Actions for Wet Prairie .....	3-519
3.3.3.7 Wet-Mesic Prairie .....	3-521
3.3.3.7.1 Community Overview.....	3-521
3.3.3.7.2 Vertebrate Species of Greatest Conservation Need Associated with Wet-Mesic Prairie .....	3-521
3.3.3.7.3 Threats and Priority Conservation Actions for Wet-Mesic Prairie .....	3-526
3.3.4 Miscellaneous Group .....	3-529
3.3.4.1 Algific Talus Slope .....	3-530
3.3.4.1.1 Community Overview.....	3-530
3.3.4.1.2 Vertebrate Species of Greatest Conservation Need Associated with Algific Talus Slope .....	3-530
3.3.4.1.3 Threats and Priority Conservation Actions for Algific Talus Slope .....	3-530
3.3.4.2 Alkaline Clay Bluff.....	3-532
3.3.4.2.1 Community Overview.....	3-532
3.3.4.2.2 Vertebrate Species of Greatest Conservation Need Associated with Alkaline Clay Bluff .....	3-532
3.3.4.2.3 Threats and Priority Conservation Actions for Alkaline Clay Bluff .....	3-532
3.3.4.3 Alvar.....	3-534
3.3.4.3.1 Community Overview.....	3-534
3.3.4.3.2 Vertebrate Species of Greatest Conservation Need Associated with Alvar .....	3-534
3.3.4.3.3 Threats and Priority Conservation Actions for Alvar .....	3-534
3.3.4.4 Bedrock Glade .....	3-536
3.3.4.4.1 Community Overview.....	3-536
3.3.4.4.2 Vertebrate Species of Greatest Conservation Need Associated with Bedrock Glade.....	3-536
3.3.4.4.3 Threats and Priority Conservation Actions for Bedrock Glade...	3-541
3.3.4.5 Dry Cliff .....	3-543
3.3.4.5.1 Community Overview.....	3-543
3.3.4.5.2 Vertebrate Species of Greatest Conservation Need Associated with Dry Cliff .....	3-543
3.3.4.5.3 Threats and Priority Conservation Actions for Dry Cliff .....	3-548
3.3.4.6 Forested Ridge and Swale .....	3-551
3.3.4.6.1 Community Overview .....	3-551

	<u>Page</u>
3.3.4.6.2 Vertebrate Species of Greatest Conservation Need Associated with Forested Ridge and Swale .....	3-551
3.3.4.6.3 Threats and Priority Conservation Actions for Forested Ridge and Swale .....	3-556
3.3.4.7 Great Lakes Alkaline Shore .....	3-558
3.3.4.7.1 Community Overview .....	3-558
3.3.4.7.2 Vertebrate Species of Greatest Conservation Need Associated with Great Lakes Alkaline Rockshore.....	3-558
3.3.4.7.3 Threats and Priority Conservation Actions for Great Lakes Alkaline Rockshore.....	3-558
3.3.4.8 Great Lakes Beach.....	3-560
3.3.4.8.1 Community Overview .....	3-560
3.3.4.8.2 Vertebrate Species of Greatest Conservation Need Associated with Great Lakes Beach.....	3-560
3.3.4.8.3 Threats and Priority Conservation Actions for Great Lakes Beach .....	3-563
3.3.4.9 Great Lakes Dune .....	3-565
3.3.4.9.1 Community Overview .....	3-565
3.3.4.9.2 Vertebrate Species of Greatest Conservation Need Associated with Great Lakes Dune .....	3-565
3.3.4.9.3 Threats and Priority Conservation Actions for Great Lakes Dune .....	3-568
3.3.4.10 Inland Beach.....	3-570
3.3.4.10.1 Community Overview .....	3-570
3.3.4.10.2 Vertebrate Species of Greatest Conservation Need Associated with Inland Beach.....	3-570
3.3.4.10.3 Threats and Priority Conservation Actions for Inland Beach.....	3-570
3.3.4.11 Moist Cliff.....	3-573
3.3.4.11.1 Community Overview .....	3-573
3.3.4.11.2 Vertebrate Species of Greatest Conservation Need Associated with Moist Cliff .....	3-573
3.3.4.11.3 Threats and Priority Conservation Actions for Moist Cliff .....	3-573
3.3.5 Northern Forest Group.....	3-577
3.3.5.1 Boreal Forest.....	3-578
3.3.5.1.1 Community Overview .....	3-578
3.3.5.1.2 Vertebrate Species of Greatest Conservation Need Associated with Boreal Forest.....	3-578
3.3.5.1.3 Threats and Priority Conservation Actions for Boreal Forest.....	3-583
3.3.5.2 Northern Dry Forest.....	3-585
3.3.5.2.1 Community Overview .....	3-585
3.3.5.2.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Dry Forest.....	3-585
3.3.5.2.3 Threats and Priority Conservation Actions for Northern Dry Forest .....	3-589
3.3.5.3 Northern Dry-Mesic Forest.....	3-593
3.3.5.3.1 Community Overview .....	3-593

	<u>Page</u>
3.3.5.3.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Dry-Mesic Forest .....	3-593
3.3.5.3.3 Threats and Priority Conservation Actions for Northern Dry-Mesic Forest .....	3-598
3.3.5.4 Northern Hardwood Swamp .....	3-601
3.3.5.4.1 Community Overview .....	3-601
3.3.5.4.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Hardwood Swamp .....	3-601
3.3.5.4.3 Threats and Priority Conservation Actions for Northern Hardwood Swamp .....	3-606
3.3.5.5 Northern Mesic Forest .....	3-609
3.3.5.5.1 Community Overview .....	3-609
3.3.5.5.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Mesic Forest .....	3-609
3.3.5.5.3 Threats and Priority Conservation Actions for Northern Mesic Forest .....	3-615
3.3.5.6 Northern Wet Forest .....	3-619
3.3.5.6.1 Community Overview .....	3-619
3.3.5.6.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Wet Forest .....	3-620
3.3.5.6.3 Threats and Priority Conservation Actions for Northern Wet Forest .....	3-625
3.3.5.7 Northern Wet-Mesic Forest .....	3-630
3.3.5.7.1 Community Overview .....	3-630
3.3.5.7.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Wet-Mesic Forest .....	3-630
3.3.5.7.3 Threats and Priority Conservation Actions for Northern Wet-Mesic Forest .....	3-635
3.3.6 Oak Savanna Group .....	3-638
3.3.6.1 Cedar Glade .....	3-640
3.3.6.1.1 Community Overview .....	3-640
3.3.6.1.2 Vertebrate Species of Greatest Conservation Need Associated with Cedar Glade .....	3-640
3.3.6.1.3 Threats and Priority Conservation Actions for Cedar Glade .....	3-645
3.3.6.2 Oak Opening .....	3-647
3.3.6.2.1 Community Overview .....	3-647
3.3.6.2.2 Vertebrate Species of Greatest Conservation Need Associated with Oak Opening .....	3-647
3.3.6.2.3 Threats and Priority Conservation Actions for Oak Opening .....	3-652
3.3.6.3 Oak Woodland .....	3-655
3.3.6.3.1 Community Overview .....	3-655
3.3.6.3.2 Vertebrate Species of Greatest Conservation Need Associated with Oak Woodland .....	3-655
3.3.6.3.3 Threats and Priority Conservation Actions for Oak Woodland ..	3-660
3.3.7 Southern Forest Group .....	3-662
3.3.7.1 Central Sand Plains – Oak Forest .....	3-663

	<u>Page</u>
3.3.7.1.1 Community Overview.....	3-663
3.3.7.1.2 Vertebrate Species of Greatest Conservation Need Associated with Central Sand Plains – Oak Forest.....	3-663
3.3.7.1.3 Threats and Priority Conservation Actions for Central Sand Plains – Oak Forest .....	3-667
3.3.7.2 Floodplain Forest.....	3-670
3.3.7.2.1 Community Overview.....	3-670
3.3.7.2.2 Vertebrate Species of Greatest Conservation Need Associated with Floodplain Forest.....	3-670
3.3.7.2.3 Threats and Priority Conservation Actions for Floodplain Forest .....	3-676
3.3.7.3 Hemlock Relict.....	3-679
3.3.7.3.1 Community Overview.....	3-679
3.3.7.3.2 Vertebrate Species of Greatest Conservation Need Associated with Hemlock Relict.....	3-679
3.3.7.3.3 Threats and Priority Conservation Actions for Hemlock Relict .....	3-682
3.3.7.4 Pine Relict.....	3-684
3.3.7.4.1 Community Overview.....	3-684
3.3.7.4.2 Vertebrate Species of Greatest Conservation Need Associated with Pine Relict .....	3-684
3.3.7.4.3 Threats and Priority Conservation Actions for Pine Relict .....	3-689
3.3.7.5 Southern Dry Forest.....	3-690
3.3.7.5.1 Community Overview.....	3-690
3.3.7.5.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Dry Forest.....	3-690
3.3.7.5.3 Threats and Priority Conservation Actions for Southern Dry Forest .....	3-695
3.3.7.6 Southern Dry-Mesic Forest.....	3-698
3.3.7.6.1 Community Overview.....	3-698
3.3.7.6.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Dry-Mesic Forest .....	3-698
3.3.7.6.3 Threats and Priority Conservation Actions for Southern Dry-Mesic Forest .....	3-704
3.3.7.7 Southern Hardwood Swamp .....	3-707
3.3.7.7.1 Community Overview.....	3-707
3.3.7.7.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Hardwood Swamp .....	3-707
3.3.7.7.3 Threats and Priority Conservation Actions for Southern Hardwood Swamp.....	3-712
3.3.7.8 Southern Mesic Forest.....	3-714
3.3.7.8.1 Community Overview.....	3-714
3.3.7.8.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Mesic Forest .....	3-714
3.3.7.8.3 Threats and Priority Conservation Actions for Southern Mesic Forest .....	3-719

	<u>Page</u>
3.3.7.9 Southern Tamarack Swamp .....	3-721
3.3.7.9.1 Community Overview .....	3-721
3.3.7.9.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Tamarack Swamp .....	3-721
3.3.7.9.3 Threats and Priority Conservation Actions for Southern Tamarack Swamp .....	3-723
3.3.7.10 White Pine – Red Maple Swamp .....	3-726
3.3.7.10.1 Community Overview .....	3-726
3.3.7.10.2 Vertebrate Species of Greatest Conservation Need Associated with White Pine – Red Maple Swamp .....	3-726
3.3.7.10.3 Threats and Priority Conservation Actions for White Pine – Red Maple Swamp .....	3-731
3.3.8 Wetland Group .....	3-733
3.3.8.1 Alder Thicket .....	3-735
3.3.8.1.1 Community Overview .....	3-735
3.3.8.1.2 Vertebrate Species of Greatest Conservation Need Associated with Alder Thicket .....	3-735
3.3.8.1.3 Threats and Priority Conservation Actions for Alder Thicket ....	3-740
3.3.8.2 Bog Relict .....	3-743
3.3.8.2.1 Community Overview .....	3-743
3.3.8.2.2 Vertebrate Species of Greatest Conservation Need Associated with Bog Relict .....	3-743
3.3.8.2.3 Threats and Priority Conservation Actions for Bog Relict .....	3-747
3.3.8.3 Boreal Rich Fen .....	3-749
3.3.8.3.1 Community Overview .....	3-749
3.3.8.3.2 Vertebrate Species of Greatest Conservation Need Associated with Boreal Rich Fen .....	3-749
3.3.8.3.3 Threats and Priority Conservation Actions for Boreal Rich Fen .....	3-751
3.3.8.4 Calcareous Fen (Southern) .....	3-753
3.3.8.4.1 Community Overview .....	3-753
3.3.8.4.2 Vertebrate Species of Greatest Conservation Need Associated with Calcareous Fen (Southern) .....	3-753
3.3.8.4.3 Threats and Priority Conservation Actions for Calcareous Fen (Southern) .....	3-757
3.3.8.4.3.1 Statewide Overview of Threats and Priority Conservation Actions for Calcareous Fen (Southern) .....	3-757
3.3.8.4.3.2 Additional Considerations for Calcareous Fen (Southern) by Ecological Landscape .....	3-757
3.3.8.5 Coastal Plain Marsh .....	3-759
3.3.8.5.1 Community Overview .....	3-759
3.3.8.5.2 Vertebrate Species of Greatest Conservation Need Associated with Coastal Plain Marsh .....	3-759
3.3.8.5.3 Threats and Priority Conservation Actions for Coastal Plain Marsh .....	3-762
3.3.8.6 Emergent Aquatic .....	3-764

	<u>Page</u>
3.3.8.6.1 Community Overview.....	3-764
3.3.8.6.2 Vertebrate Species of Greatest Conservation Need Associated with Emergent Aquatic .....	3-764
3.3.8.6.3 Threats and Priority Conservation Actions for Emergent Aquatic .....	3-770
3.3.8.7 Emergent Aquatic – Wild Rice .....	3-775
3.3.8.7.1 Community Overview.....	3-775
3.3.8.7.2 Vertebrate Species of Greatest Conservation Need Associated with Emergent Aquatic – Wild Rice .....	3-775
3.3.8.7.3 Threats and Priority Conservation Actions for Emergent Aquatic – Wild Rice.....	3-779
3.3.8.8 Ephemeral Pond.....	3-782
3.3.8.8.1 Community Overview.....	3-782
3.3.8.8.2 Vertebrate Species of Greatest Conservation Need Associated with Ephemeral Pond .....	3-782
3.3.8.8.3 Threats and Priority Conservation Actions for Ephemeral Pond .....	3-787
3.3.8.9 Great Lakes Coastal Fen.....	3-790
3.3.8.9.1 Community Overview.....	3-790
3.3.8.9.2 Vertebrate Species of Greatest Conservation Need Associated with Great Lakes Coastal Fen .....	3-790
3.3.8.9.3 Threats and Priority Conservation Actions for Great Lakes Coastal Fen .....	3-795
3.3.8.10 Interdunal Wetland.....	3-797
3.3.8.10.1 Community Overview.....	3-797
3.3.8.10.2 Vertebrate Species of Greatest Conservation Need Associated with Interdunal Wetland .....	3-797
3.3.8.10.3 Threats and Priority Conservation Actions for Interdunal Wetland .....	3-801
3.3.8.11 Northern Sedge Meadow .....	3-803
3.3.8.11.1 Community Overview.....	3-803
3.3.8.11.2 Vertebrate Species of Greatest Conservation Need Associated with Northern Sedge Meadow.....	3-813
3.3.8.11.3 Threats and Priority Conservation Actions for Northern Sedge Meadow.....	3-809
3.3.8.12 Open Bog.....	3-813
3.3.8.12.1 Community Overview.....	3-813
3.3.8.12.2 Vertebrate Species of Greatest Conservation Need Associated with Open Bog.....	3-813
3.3.8.12.3 Threats and Priority Conservation Actions for Open Bog.....	3-819
3.3.8.13 Shrub Carr.....	3-822
3.3.8.13.1 Community Overview.....	3-822
3.3.8.13.2 Vertebrate Species of Greatest Conservation Need Associated with Shrub Carr .....	3-822
3.3.8.13.3 Threats and Priority Conservation Actions for Shrub Carr .....	3-828
3.3.8.14 Southern Sedge Meadow .....	3-831

	<u>Page</u>
3.3.8.14.1 Community Overview.....	3-831
3.3.8.14.2 Vertebrate Species of Greatest Conservation Need Associated with Southern Sedge Meadow.....	3-831
3.3.8.14.3 Threats and Priority Conservation Actions for Southern Sedge Meadow.....	3-836
3.3.8.15 Submergent Aquatic .....	3-838
3.3.8.15.1 Community Overview.....	3-838
3.3.8.15.2 Vertebrate Species of Greatest Conservation Need Associated with Submergent Aquatic .....	3-838
3.3.8.15.3 Threats and Priority Conservation Actions for Submergent Aquatic .....	3-844
3.3.8.16 Submergent Aquatic – Oligotrophic Marsh.....	3-850
3.3.8.16.1 Community Overview.....	3-850
3.3.8.16.2 Vertebrate Species of Greatest Conservation Need Associated with Submergent Aquatic – Oligotrophic Marsh.....	3-850
3.3.8.16.3 Threats and Priority Conservation Actions for Submergent Aquatic – Oligotrophic Marsh.....	3-853
3.3.9 Surrogate Communities .....	3-855
3.3.9.1 Surrogate Grasslands.....	3-855
3.3.9.1.1 Community Overview.....	3-855
3.3.9.1.2 Vertebrate Species of Greatest Conservation Need Associated with Surrogate Grasslands .....	3-856
3.3.9.1.3 Threats and Priority Conservation Actions for Surrogate Grasslands .....	3-861

#### **Chapter 4. Invertebrate Species of Greatest Conservation Need: Assessments and Conservation Strategies**

4.1 General Invertebrate Threats and Issues .....	4-1
4.2 General Invertebrate Priority Conservation Actions .....	4-1
4.3 Invertebrate Species of Greatest Conservation Need.....	4-2
4.4 Threats, Issues, and Priority Conservation Actions by Taxonomic Group .....	4-13

#### **Chapter 5. Monitoring**

5.1 Overview and Purpose of Monitoring Species of Greatest Conservation Need, Natural Communities, and Priority Conservation Actions.....	5-1
5.2 Adaptive Management.....	5-2
5.3 Conservation Action Performance Measures .....	5-4
5.4 Designing and Implementing a CWCP Monitoring Program.....	5-6
5.5 Species of Greatest Conservation Need Monitoring .....	5-10
5.5.1 Birds .....	5-10
5.5.2 Fish.....	5-12
5.5.3 Herptiles .....	5-12
5.5.4 Mammals .....	5-15
5.5.5 Terrestrial Invertebrates.....	5-17
5.5.6 Aquatic Invertebrates.....	5-17

	<u>Page</u>
5.6 Species of Greatest Conservation Need Habitat (Natural Community) Monitoring ...	5-20
5.6.1 Overview of Habitat Monitoring Gaps .....	5-20
5.6.2 Gaps in Aquatic Monitoring .....	5-21
5.6.3 Gaps in Barrens Monitoring.....	5-22
5.6.4 Gaps in Grassland Monitoring .....	5-22
5.6.5 Gaps in Northern Forest Monitoring.....	5-22
5.6.6 Gaps in Oak Savanna Monitoring.....	5-23
5.6.7 Gaps in Southern Forest Monitoring.....	5-23
5.6.8 Gaps in Wetland Monitoring.....	5-24
5.7 Importance of Citizen-collected Data to CWCP Monitoring .....	5-25
5.7.1 Uses of Citizen-collected Data.....	5-25
5.7.2 Elements in the Development of Citizen-based Monitoring Programs.....	5-26
5.7.3 WDNR Support for the Expansion of Citizen-based Monitoring Activities ....	5-28
 <b>Chapter 6. Public Participation</b>	
6.1 Communication and Coordination for <i>Strategy</i> Development .....	6-1
6.2 Communication and Coordination for <i>Strategy</i> Implementation .....	6-3
 <b>Chapter 7. Review and Revision</b>	
7.1 Introduction .....	7-1
7.2 Organization .....	7-1
7.3 Scope and Recommendations for <i>Strategy</i> Review and Revision .....	7-2
 <b>Bibliography</b>	
 <b>Appendices</b>	
A. An Alphabetical Listing of Common and Scientific Names of Organisms Mentioned in Wisconsin's <i>Strategy for Wildlife Species of Greatest Conservation Need</i> that Were Not Evaluated in the Process of Determining Vertebrate and/or Invertebrate Species of Greatest Conservation Need	
B. Categorization of All Vertebrate Species Considered During the Process of Determining Wisconsin's Species of Greatest Conservation Need	
C. State Natural Areas and other Ecological Reference Sites by Ecological Landscape	
D. Existing or Historic Inventory and Monitoring Programs in Wisconsin	
E. Public Involvement Materials	
F. Letters of Support	
G. Quick Guide to the 8 Required Elements	
H. Selected Index of Vertebrate Species of Greatest Conservation Need in Wisconsin's <i>Strategy for Wildlife Species of Greatest Conservation Need</i>	

## LIST OF TABLES

Table	Page
2-1. Natural and surrogate communities in Wisconsin used in this report.....	2-8
2-2. Opportunities for sustaining Wisconsin's natural communities by Ecological Landscape.....	2-9
2-3. Natural communities occurring in the Superior Coastal Plain arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-13
2-4. Natural communities occurring in the Northwest Lowlands arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-16
2-5. Natural communities occurring in the Northwest Sands arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-18
2-6. Natural communities occurring in the North Central Forest arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-21
2-7. Natural communities occurring in the Northern Highlands arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-23
2-8. Natural communities occurring in the Forest Transition arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-26
2-9. Natural communities occurring in the Northeast Sands arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-28
2-10. Natural communities occurring in the Northern Lake Michigan Coastal arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-31
2-11. Natural communities occurring in the Central Lake Michigan Coastal arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-34
2-12. Natural communities occurring in the Western Prairie arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-36
2-13. Natural communities occurring in the Western Coulee and Ridges arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-39
2-14. Natural communities occurring in the Southwest Savanna arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-42
2-15. Natural communities occurring in the Central Sand Plains arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-45
2-16. Natural communities occurring in the Central Sand Hills arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-48
2-17. Natural communities occurring in the Southeast Glacial Plains arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-51
2-18. Natural communities occurring in the Southern Lake Michigan Coastal arranged by the level of opportunity to sustain and manage the natural community type in this Ecological Landscape.....	2-54
2-19. Justification for Addition of Individual Bird Species to the List of Vertebrate Species of Greatest Conservation Need.....	2-60

Table	Page
2-20. Justification for Removal of Individual Bird Species from the list of Vertebrate Species of Greatest Conservation Need. ....	2-61
2-21. Justification for Addition of Individual Herptile Species to the List of Vertebrate Species of Greatest Conservation Need. ....	2-61
2-22. Herptile Species for which Additional Inventory and Monitoring is Needed. ....	2-63
2-23. Nonarthropod Invertebrates - Assessment of Progress Toward Answering Three Questions Key to Conservation Planning. ....	2-67
2-24. Noninsect Arthropods - Assessment of Progress Toward Answering Three Questions Key to Conservation Planning. ....	2-68
2-25. Insects and Related Hexapoda – Assessment of Progress Toward Answering Three Questions Key to Conservation Planning. ....	2-69
2-26. Invertebrate Taxa Not Reviewed for Species of Greatest Conservation Need Status in Current Planning Effort. ....	2-70
2-27. Invertebrate Taxa for which Only Certain Families or Species Groups were Reviewed for Species of Greatest Conservation Need Status During the Current Planning Effort. ....	2-71
2-28. Description of Terms Used to Define Opportunities for Protection, Restoration and/or Management of Natural Communities by Ecological Landscapes. ....	2-80
2-29. Key to Probability of Occurrence Assigned to Vertebrate Species of Greatest Conservation Need. ....	2-81
2-30. Key to Natural Community Associations Assigned to Vertebrate Species of Greatest Conservation Need. ....	2-82
3-1. Vertebrate Species of Greatest Conservation Need. ....	3-1
3-2. Bird Species of Greatest Conservation Need. ....	3-9
3-3. Fish Species of Greatest Conservation Need. ....	3-172
3-4. Herptile Species of Greatest Conservation Need. ....	3-217
3-5. Mammal Species of Greatest Conservation Need. ....	3-269
3-6. Summary of Species of Greatest Conservation Need by Ecological Landscape. ....	3-303
3-7. Vertebrate Species of Greatest Conservation Need occurring in the Superior Coastal Plain. ....	3-304
3-8. Vertebrate Species of Greatest Conservation Need occurring in the Northwest Lowlands. ....	3-305
3-9. Vertebrate Species of Greatest Conservation Need occurring in the Northwest Sands. ....	3-306
3-10. Vertebrate Species of Greatest Conservation Need occurring in the North Central Forest. ....	3-307
3-11. Vertebrate Species of Greatest Conservation Need occurring in the Northern Highland. ....	3-308
3-12. Vertebrate Species of Greatest Conservation Need occurring in the Forest Transition. ....	3-309
3-13. Vertebrate Species of Greatest Conservation Need occurring in the Northeast Sands. ....	3-310
3-14. Vertebrate Species of Greatest Conservation Need occurring in the Northern Lake Michigan Coastal. ....	3-311
3-15. Vertebrate Species of Greatest Conservation Need occurring in the Central Lake Michigan Coastal. ....	3-313
3-16. Vertebrate Species of Greatest Conservation Need occurring in the Western Prairie. ....	3-314
3-17. Vertebrate Species of Greatest Conservation Need occurring in the Western Coulee and Ridges. ....	3-315
3-18. Vertebrate Species of Greatest Conservation Need occurring in the Southwest Savanna. ....	3-317
3-19. Vertebrate Species of Greatest Conservation Need occurring in the Central Sand Plains. ....	3-318
3-20. Vertebrate Species of Greatest Conservation Need occurring in the Central Sand Hills. ....	3-320

Table	Page
3-21. Vertebrate Species of Greatest Conservation Need occurring in the Southeast Glacial Plain .....	3-321
3-22. Vertebrate Species of Greatest Conservation Need occurring in the Southern Lake Michigan Coastal.....	3-323
3-23. Vertebrate Species of Greatest Conservation Need with no high scoring “natural community-Ecological Landscape” combinations .....	3-325
3-24. Vertebrate Species of Greatest Conservation Need with only a limited number of high scoring “natural community-Ecological Landscape” combinations .....	3-326
3-25. Ecological priority habitat-species opportunities within the Superior Coastal Plain .....	3-328
3-26. Ecological Priority habitat-species opportunities within the Northwest Lowlands .....	3-331
3-27. Ecological Priority habitat-species opportunities within the Northwest Sands.....	3-333
3-28. Ecological Priority habitat-species opportunities within the North Central Forest .....	3-337
3-29. Ecological Priority habitat-species opportunities within the Northern Highland .....	3-342
3-30. Ecological Priority habitat-species opportunities within the Forest Transition.....	3-345
3-31. Ecological Priority habitat-species opportunities within the Northeast Sands.....	3-347
3-32. Ecological Priority habitat-species opportunities within the Northern Lake Michigan Coastal.....	3-349
3-33. Ecological Priority habitat-species opportunities within the Central Lake Michigan Coastal .....	3-352
3-34. Ecological Priority habitat-species opportunities within the Western Prairie .....	3-354
3-35. Ecological Priority habitat-species opportunities within the Western Coulee and Ridges .....	3-357
3-36. Ecological Priority habitat-species opportunities within the Southwest Savanna .....	3-366
3-37. Ecological Priority habitat-species opportunities within the Central Sand Plains .....	3-369
3-38. Ecological Priority habitat-species opportunities within the Central Sand Hills .....	3-373
3-39. Ecological Priority habitat-species opportunities within the Southeast Glacial Plain .....	3-376
3-40. Ecological Priority habitat-species opportunities within the Southern Lake Michigan Coastal.....	3-384
3-41. Natural communities evaluated in the development of Wisconsin's <i>Strategy for Wildlife Species of Greatest Conservation Need</i> .....	3-387
3-42. Number of vertebrate Species of Greatest Conservation Need associated with each natural community group .....	3-388
3-43. Number of vertebrate Species of Greatest Conservation Need associated with each natural community (including surrogate prairie grasslands).....	3-388
3-44. Relative abundance of natural communities both historically and currently. ....	3-391
3-45. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with coldwater streams.....	3-397
3-46. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with coldwater streams and their association with Ecological Landscapes that support coldwater streams.....	3-399
3-47. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with coldwater streams and their association with Ecological Landscapes that support coldwater streams.....	3-400
3-48. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with coolwater streams.....	3-403
3-49. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with coolwater streams and their association with Ecological Landscapes that support coolwater streams.....	3-405

Table	Page
3-50. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with coolwater streams and their association with Ecological Landscapes that support coolwater streams.....	3-406
3-51. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with impoundments/reservoirs.....	3-410
3-52. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with impoundments/reservoirs and their association with Ecological Landscapes that support impoundments/reservoirs. ....	3-412
3-53. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with impoundments/reservoirs and their association with Ecological Landscapes that support impoundments/reservoirs. ....	3-413
3-54. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with inland lakes. ....	3-418
3-55. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with inland lakes and their association with Ecological Landscapes that support inland lakes. ....	3-420
3-56. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with inland lakes and their association with Ecological Landscapes that support inland lakes. ....	3-421
3-57. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Lake Michigan. ....	3-424
3-58. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Lake Michigan and their association with Ecological Landscapes that support Lake Michigan. ....	3-426
3-59. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with Lake Michigan and their association with Ecological Landscapes that support Lake Michigan. ....	3-427
3-60. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Lake Superior. ....	3-430
3-61. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Lake Superior and their association with Ecological Landscapes that support Lake Superior. ....	3-432
3-62. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with Lake Superior and their association with Ecological Landscapes that support Lake Superior. ....	3-433
3-63. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with warmwater rivers.....	3-436
3-64. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with warmwater rivers and their association with Ecological Landscapes that support warmwater rivers.....	3-438
3-65. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with warmwater rivers and their association with Ecological Landscapes that support warmwater rivers.....	3-439
3-66. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with warmwater streams.....	3-443
3-67. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with warmwater streams and their association with Ecological Landscapes that support warmwater streams.....	3-445

Table	Page
3-68. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with warmwater streams and their association with Ecological Landscapes that support warmwater streams.....	3-446
3-69. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Great Lakes barrens communities. ....	3-451
3-70. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Great Lakes barrens communities and their association with Ecological Landscapes that support Great Lakes barrens.....	3-452
3-71. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with Great Lakes barrens communities and their association with Ecological Landscapes that support Great Lakes barrens.....	3-453
3-72. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with oak barrens communities.....	3-458
3-73. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with oak barrens communities and their association with Ecological Landscapes that support oak barrens. ....	3-460
3-74. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with oak barrens communities and their association with Ecological Landscapes that support oak barrens. ....	3-461
3-75. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with pine barrens communities.....	3-467
3-76. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with pine barrens communities and their association with Ecological Landscapes that support pine barrens.....	3-468
3-77. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with pine barrens communities and their association with Ecological Landscapes that support pine barrens. ....	3-469
3-78. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with bracken grassland communities.....	3-475
3-79. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with bracken grassland communities and their association with Ecological Landscapes that support bracken grassland. ....	3-477
3-80. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with bracken grassland communities and their association with Ecological Landscapes that support bracken grassland. ....	3-478
3-81. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with dry prairie communities.....	3-483
3-82. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with dry prairie communities and their association with Ecological Landscapes that support dry prairie. ....	3-485
3-83. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with dry prairie communities and their association with Ecological Landscapes that support dry prairie. ....	3-486
3-84. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with dry-mesic prairie communities.....	3-492
3-85. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with dry-mesic prairie communities and their association with Ecological Landscapes that support dry-mesic prairie.....	3-494

Table	Page
3-86. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with dry-mesic prairie communities and their association with Ecological Landscapes that support dry-mesic prairie.....	3-495
3-87. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with mesic prairie communities.....	3-501
3-88. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with mesic prairie communities and their association with Ecological Landscapes that support mesic prairie.....	3-502
3-89. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with mesic prairie communities and their association with Ecological Landscapes that support mesic prairie. ....	3-503
3-90. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with sand prairie communities.....	3-509
3-91. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with sand prairie communities and their association with Ecological Landscapes that support sand prairie. ....	3-510
3-92. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with sand prairie communities and their association with Ecological Landscapes that support sand prairie. ....	3-511
3-93. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with wet prairie communities. ....	3-516
3-94. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with wet prairie communities and their association with Ecological Landscapes that support wet prairie.....	3-517
3-95. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with wet prairie communities and their association with Ecological Landscapes that support wet prairie.....	3-518
3-96. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with wet-mesic prairie communities. ....	3-522
3-97. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with wet-mesic prairie communities and their association with Ecological Landscapes that support wet-mesic prairie. ....	3-523
3-98. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with wet-mesic prairie communities and their association with Ecological Landscapes that support wet-mesic prairie. ....	3-524
3-99. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with bedrock glade communities. ....	3-536
3-100. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with bedrock glade communities and their association with Ecological Landscapes that support bedrock glade. ....	3-538
3-101. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with bedrock glade communities and their association with Ecological Landscapes that support bedrock glade. ....	3-539
3-102. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with dry cliff communities. ....	3-544
3-103. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with dry cliff communities and their association with Ecological Landscapes that support dry cliff. ....	3-545

Table	Page
3-104. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with dry cliff communities and their association with Ecological Landscapes that support dry cliff. ....	3-546
3-105. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with forested ridge and swale communities. ....	3-552
3-106. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with forested ridge and swale communities and their association with Ecological Landscapes that support forested ridge and swale. ....	3-553
3-107. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with forested ridge and swale communities and their association with Ecological Landscapes that support forested ridge and swale. ....	3-554
3-108. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Great Lakes beach communities. ....	3-560
3-109. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Great Lakes beach communities and their association with Ecological Landscapes that support Great Lakes beach. ....	3-561
3-110. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Great Lakes dune communities. ....	3-565
3-111. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Great Lakes dune communities and their association with Ecological Landscapes that support Great Lakes dune. ....	3-566
3-112. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with boreal forest communities. ....	3-592
3-113. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with boreal forest communities and their association with Ecological Landscapes that support boreal forest. ....	3-594
3-114. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with boreal forest communities and their association with Ecological Landscapes that support boreal forest. ....	3-581
3-115. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern dry forest communities. ....	3-585
3-116. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern dry forest communities and their association with Ecological Landscapes that support northern dry forest. ....	3-587
3-117. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern dry forest communities and their association with Ecological Landscapes that support northern dry forest. ....	3-588
3-118. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern dry-mesic forest communities. ....	3-594
3-119. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern dry-mesic forest communities and their association with Ecological Landscapes that support northern dry-mesic forest. ....	3-595
3-120. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern dry-mesic forest communities and their association with Ecological Landscapes that support northern dry-mesic forest. ....	3-596
3-121. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern hardwood swamp communities. ....	3-601
3-122. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern hardwood swamp communities and their association with Ecological Landscapes that support northern hardwood swamp. ....	3-603

Table	Page
3-123. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern hardwood swamp communities and their association with Ecological Landscapes that support northern hardwood swamp. ....	3-604
3-124. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern mesic forest communities. ....	3-610
3-125. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern mesic forest communities and their association with Ecological Landscapes that support northern mesic forest. ....	3-612
3-126. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern mesic forest communities and their association with Ecological Landscapes that support northern mesic forest. ....	3-613
3-127. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern wet forest communities. ....	3-621
3-128. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern wet forest communities and their association with Ecological Landscapes that support northern wet forest. ....	3-622
3-129. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern wet forest communities and their association with Ecological Landscapes that support northern wet forest. ....	3-623
3-130. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern wet-mesic forest communities. ....	3-631
3-131. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern wet-mesic forest communities and their association with Ecological Landscapes that support northern wet-mesic forest. ....	3-632
3-132. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern wet-mesic forest communities and their association with Ecological Landscapes that support northern wet-mesic forest. ....	3-633
3-133. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with cedar glade communities. ....	3-641
3-134. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with cedar glade communities and their association with Ecological Landscapes that support cedar glade. ....	3-642
3-135. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with cedar glade communities and their association with Ecological Landscapes that support cedar glade. ....	3-643
3-136. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with oak opening communities. ....	3-648
3-137. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with oak opening communities and their association with Ecological Landscapes that support oak opening. ....	3-649
3-138. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with oak opening communities and their association with Ecological Landscapes that support oak opening. ....	3-650
3-139. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with oak woodland communities. ....	3-656
3-140. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with oak woodland communities and their association with Ecological Landscapes that support oak woodland. ....	3-657

Table	Page
3-141. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with oak woodland communities and their association with Ecological Landscapes that support oak woodland. ....	3-658
3-142. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Central Sands pine – oak forest communities. ....	3-663
3-143. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Central Sands pine – oak forest communities and their association with Ecological Landscapes that support Central Sands pine – oak forest. ....	3-664
3-144. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with Central Sands pine – oak forest communities and their association with Ecological Landscapes that support Central Sands pine – oak forest. ....	3-665
3-145. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with floodplain forest communities. ....	3-671
3-146. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with floodplain forest communities and their association with Ecological Landscapes that support floodplain forest. ....	3-673
3-147. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with floodplain forest communities and their association with Ecological Landscapes that support floodplain forest. ....	3-674
3-148. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with hemlock relict communities. ....	3-679
3-149. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with hemlock relict communities and their association with Ecological Landscapes that support hemlock relict. ....	3-681
3-150. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with pine relict communities. ....	3-684
3-151. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with pine relict communities and their association with Ecological Landscapes that support pine relict. ....	3-686
3-152. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with pine relict communities and their association with Ecological Landscapes that support pine relict. ....	3-687
3-153. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern dry forest communities. ....	3-690
3-154. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with southern dry forest communities and their association with Ecological Landscapes that support southern dry forest. ....	3-692
3-155. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern dry forest communities and their association with Ecological Landscapes that support southern dry forest. ....	3-693
3-156. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern dry-mesic forest communities. ....	3-699
3-157. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with southern dry-mesic forest communities and their association with Ecological Landscapes that support southern dry-mesic forest. ....	3-701
3-158. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern dry-mesic forest communities and their association with Ecological Landscapes that support southern dry-mesic forest. ....	3-702
3-159. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern hardwood swamp communities. ....	3-708

Table	Page
3-160. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with southern hardwood swamp communities and their association with Ecological Landscapes that support southern hardwood swamp.....	3-709
3-161. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern hardwood swamp communities and their association with Ecological Landscapes that support southern hardwood swamp.....	3-710
3-162. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern mesic forest communities.....	3-715
3-163. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with southern mesic forest communities and their association with Ecological Landscapes that support southern mesic forest. ....	3-716
3-164. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern mesic forest communities and their association with Ecological Landscapes that support southern mesic forest. ....	3-717
3-165. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern tamarack swamp communities.....	3-721
3-166. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern tamarack swamp communities and their association with Ecological Landscapes that support southern tamarack swamp. ....	3-722
3-167. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with white pine – red maple swamp communities .....	3-727
3-168. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with white pine – red maple swamp communities and their association with Ecological Landscapes that support white pine – red maple swamp. ....	3-728
3-169. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with white pine – red maple swamp communities and their association with Ecological Landscapes that support white pine – red maple swamp. ....	3-729
3-170. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with alder thicket communities.....	3-736
3-171. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with alder thicket communities and their association with Ecological Landscapes that support alder thicket.....	3-737
3-172. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with alder thicket communities and their association with Ecological Landscapes that support alder thicket. ....	3-738
3-173. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with bog relict communities.....	3-743
3-174. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with bog relict communities and their association with Ecological Landscapes that support bog relict. ....	3-744
3-175. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with bog relict communities and their association with Ecological Landscapes that support bog relict. ....	3-745
3-176. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with boreal rich fen communities.....	3-749
3-177. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with boreal rich fen communities and their association with Ecological Landscapes that support boreal rich fen. ....	3-750

Table	Page
3-178. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with calcareous fen (southern) communities.....	3-753
3-179. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with calcareous fen (southern) communities and their association with Ecological Landscapes that support calcareous fen (southern). ....	3-754
3-180. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with calcareous fen (southern) communities and their association with Ecological Landscapes that support calcareous fen (southern). ....	3-755
3-181. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with coastal plain marsh communities.....	3-760
3-182. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with coastal plain marsh communities and their association with Ecological Landscapes that support coastal plain marsh. ....	3-761
3-183. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with emergent aquatic communities.....	3-765
3-184. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with emergent aquatic communities and their association with Ecological Landscapes that support emergent aquatic.....	3-767
3-185. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with emergent aquatic communities and their association with Ecological Landscapes that support emergent aquatic.....	3-768
3-186. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with emergent aquatic – wild rice communities. ....	3-775
3-187. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with emergent aquatic – wild rice communities and their association with Ecological Landscapes that support emergent aquatic – wild rice. ....	3-776
3-188. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with emergent aquatic – wild rice communities and their association with Ecological Landscapes that support emergent aquatic – wild rice.....	3-777
3-189. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with ephemeral pond communities. ....	3-783
3-190. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with ephemeral pond communities and their association with Ecological Landscapes that support ephemeral ponds.....	3-784
3-191. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with ephemeral pond communities and their association with Ecological Landscapes that support ephemeral ponds.....	3-785
3-192. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with Great Lakes coastal fen communities. ....	3-791
3-193. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with Great Lakes coastal fen communities and their association with Ecological Landscapes that support Great Lakes coastal fens. ....	3-792
3-194. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with Great Lakes coastal fen communities and their association with Ecological Landscapes that support Great Lakes coastal fens.....	3-793
3-195. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with interdunal wetland communities.....	3-797
3-196. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with interdunal wetland communities and their association with Ecological Landscapes that support interdunal wetland. ....	3-798

Table	Page
3-197. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with interdunal wetland communities and their association with Ecological Landscapes that support interdunal wetland. ....	3-799
3-198. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with northern sedge meadow communities. ....	3-804
3-199. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with northern sedge meadow communities and their association with Ecological Landscapes that support northern sedge meadow. ....	3-806
3-200. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with northern sedge meadow communities and their association with Ecological Landscapes that support northern sedge meadow. ....	3-807
3-201. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with open bog communities. ....	3-814
3-202. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with open bog communities and their association with Ecological Landscapes that support open bog. ....	3-816
3-203. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with open bog communities and their association with Ecological Landscapes that support open bog. ....	3-817
3-204. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with shrub-carr communities. ....	3-823
3-205. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with shrub-carr communities and their association with Ecological Landscapes that support shrub-carr. ....	3-825
3-206. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with shrub-carr communities and their association with Ecological Landscapes that support shrub-carr. ....	3-826
3-207. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with southern sedge meadow communities. ....	3-832
3-208. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with southern sedge meadow communities and their association with Ecological Landscapes that support southern sedge meadow. ....	3-833
3-209. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with southern sedge meadow communities and their association with Ecological Landscapes that support southern sedge meadow. ....	3-835
3-210. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with submergent aquatic communities. ....	3-839
3-211. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with submergent aquatic communities and their association with Ecological Landscapes that support submergent aquatic. ....	3-841
3-212. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> associated with submergent aquatic communities and their association with Ecological Landscapes that support submergent aquatic. ....	3-842
3-213. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>moderately</u> or <u>significantly</u> associated with submergent aquatic-oligotrophic marsh communities. ....	3-850
3-214. Vertebrate Species of Greatest Conservation Need that are (or historically were) <u>significantly</u> associated with submergent aquatic-oligotrophic marsh communities and their association with Ecological Landscapes that support submergent aquatic-oligotrophic marsh. ....	3-851

Table	Page
3-215. Vertebrate Species of Greatest Conservation Need that are (or historically were) <i>moderately</i> associated with submergent aquatic-oligotrophic marsh communities and their association with Ecological Landscapes that support submergent aquatic-oligotrophic marsh.....	3-852
3-216. Vertebrate Species of Greatest Conservation Need that are (or historically were) <i>moderately</i> or <i>significantly</i> associated with surrogate grasslands.....	3-857
3-217. Vertebrate Species of Greatest Conservation Need that are (or historically were) <i>significantly</i> associated with surrogate grassland communities and their association with Ecological Landscapes that support surrogate grasslands.....	3-858
3-218. Vertebrate Species of Greatest Conservation Need that are (or historically were) <i>moderately</i> associated with surrogate grassland communities and their association with Ecological Landscapes that support surrogate grasslands.....	3-859
4-1. Invertebrate Species of Greatest Conservation Need: Nonarthropod Invertebrates .....	4-2
4-2. Invertebrate Species of Greatest Conservation Need: Noninsect Arthropods .....	4-4
4-3. Invertebrate Species of Greatest Conservation Need: Insects.....	4-5
4-4. Mussel Species of Greatest Conservation Need that utilize vertebrate Species of Greatest Conservation Need as hosts.....	4-16
5-1. The relationships among performance indicators, monitoring, and adaptive management.....	5-4

## LIST OF FIGURES

Figure	Page
1-1. Relationship between Species of Greatest Conservation Need, natural communities, and Ecological Landscapes, and ecological priorities. ....	1-3
2-1. Ecological Landscapes of Wisconsin. ....	2-5
2-2. Tension Zone in Wisconsin. ....	2-6
2-3. Superior Coastal Plain Ecological Landscape.....	2-11
2-4. Current land cover in the Superior Coastal Plain Ecological Landscape. ....	2-11
2-5. Public land ownership in the Superior Coastal Plain Ecological Landscape.....	2-12
2-6. Northwest Lowlands Ecological Landscape.....	2-14
2-7. Current land cover in the Northwest Lowlands Ecological Landscape.....	2-14
2-8. Public land ownership in the Northwest Lowlands Ecological Landscape. ....	2-15
2-9. Northwest Sands Ecological Landscape.....	2-17
2-10. Current land cover in the Northwest Sands Ecological Landscape. ....	2-17
2-11. Public land ownership in the Northwest Sands Ecological Landscape.....	2-17
2-12. North Central Forest Ecological Landscape.....	2-19
2-13. Current land cover in the North Central Forest Ecological Landscape.....	2-19
2-14. Public land ownership in the North Central Forest Ecological Landscape.....	2-19
2-15. Northern Highlands Ecological Landscape.....	2-22
2-16. Current land cover in the Northern Highlands Ecological Landscape.....	2-22
2-17. Public land ownership in the Northern Highlands Ecological Landscape.....	2-22
2-18. Forest Transition Ecological Landscape.....	2-24
2-19. Current land cover in the Forest Transition Ecological Landscape. ....	2-24
2-20. Public land ownership in the Forest Transition Ecological Landscape.....	2-24
2-21. Northeast Sands Ecological Landscape.....	2-27
2-22. Current land cover in the Northeast Sands Ecological Landscape. ....	2-27
2-23. Public land ownership in the Northeast Sands Ecological Landscape.....	2-27
2-24. Northern Lake Michigan Coastal Ecological Landscape.....	2-29
2-25. Current land cover in the Northern Lake Michigan Coastal Ecological Landscape.....	2-29
2-26. Public land ownership in the Northern Lake Michigan Coastal Ecological Landscape.....	2-29
2-27. Central Lake Michigan Coastal Ecological Landscape.....	2-32
2-28. Current land cover in the Central Lake Michigan Coastal Ecological Landscape. ....	2-32
2-29. Public land ownership in the Central Lake Michigan Coastal Ecological Landscape.....	2-33
2-30. Western Prairie Ecological Landscape.....	2-35
2-31. Current land cover in the Western Prairie Ecological Landscape.....	2-35
2-32. Public land ownership in the Western Prairie Ecological Landscape.....	2-35
2-33. Western Coulee and Ridges Ecological Landscape.....	2-37
2-34. Current land cover in the Western Coulee and Ridges Ecological Landscape.....	2-37
2-35. Public land ownership in the Western Coulee and Ridges Ecological Landscape. ....	2-37
2-36. Southwest Savanna Ecological Landscape. ....	2-40
2-37. Current land cover in the Southwest Savanna Ecological Landscape.....	2-40
2-38. Public land ownership in the Southwest Savanna Ecological Landscape.....	2-40
2-39. Central Sand Plains Ecological Landscape.....	2-43
2-40. Current land cover in the Central Sand Plains Ecological Landscape.....	2-43
2-41. Public land ownership in the Central Sand Plains Ecological Landscape.....	2-43
2-42. Central Sand Hills Ecological Landscape.....	2-46
2-43. Current land cover in the Central Sand Hills Ecological Landscape.....	2-46
2-44. Public land ownership in the Central Sand Hills Ecological Landscape.....	2-46
2-45. Southeast Glacial Plains Ecological Landscape. ....	2-49
2-46. Current land cover in the Southeast Glacial Plains Ecological Landscape.....	2-49
2-47. Public land ownership in the Southeast Glacial Plains Ecological Landscape. ....	2-49

Figure	Page
2-48. Southern Lake Michigan Coastal Ecological Landscape.....	2-52
2-49. Current land cover in the Southern Lake Michigan Coastal Ecological Landscape.....	2-52
2-50. Public land ownership in the Southern Lake Michigan Coastal Ecological Landscape.....	2-52
3-1. Vertebrate Species of Greatest Conservation Need that have both a significant association with coldwater streams and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of coldwater streams.....	3-401
3-2. Vertebrate Species of Greatest Conservation Need that have both a significant association with coolwater streams and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of coolwater streams.....	3-407
3-3. Vertebrate Species of Greatest Conservation Need that have both a significant association with impoundments/reservoirs and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of impoundments/reservoirs.....	3-414
3-4. Vertebrate Species of Greatest Conservation Need that have both a significant association with inland lakes and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of inland lakes.....	3-422
3-5. Vertebrate Species of Greatest Conservation Need that have both a significant association with Lake Michigan and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Lake Michigan.....	3-428
3-6. Vertebrate Species of Greatest Conservation Need that have both a significant association with Lake Superior and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Lake Superior.....	3-434
3-7. Vertebrate Species of Greatest Conservation Need that have both a significant association with warmwater rivers and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of warmwater rivers.....	3-440
3-8. Vertebrate Species of Greatest Conservation Need that have both a significant association with warmwater streams and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of warmwater streams.....	3-447
3-9. Vertebrate Species of Greatest Conservation Need that have both a significant association with Great Lakes barrens and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Great Lakes barrens.....	3-454
3-10. Vertebrate Species of Greatest Conservation Need that have both a significant association with oak barrens and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of oak barrens.....	3-462
3-11. Vertebrate Species of Greatest Conservation Need that have both a significant association with pine barrens and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of pine barrens.....	3-470

Figure	Page
3-12. Vertebrate Species of Greatest Conservation Need that have both a significant association with bracken grassland and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of bracken grassland. ....	3-479
3-13. Vertebrate Species of Greatest Conservation Need that have both a significant association with dry prairie and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of dry prairie .....	3-487
3-14. Vertebrate Species of Greatest Conservation Need that have both a significant association with dry-mesic prairie and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of dry-mesic prairie.....	3-496
3-15. Vertebrate Species of Greatest Conservation Need that have both a significant association with mesic prairie and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of mesic prairie. ....	3-504
3-16. Vertebrate Species of Greatest Conservation Need that have both a significant association with sand prairie and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of sand prairie. ....	3-512
3-17. Vertebrate Species of Greatest Conservation Need that have both a significant association with wet-mesic prairie and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of wet-mesic prairie.....	3-525
3-18. Vertebrate Species of Greatest Conservation Need that have both a significant association with bedrock glade and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of bedrock glade. ....	3-540
3-19. Vertebrate Species of Greatest Conservation Need that have both a significant association with dry cliff and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of dry cliff .....	3-547
3-20. Vertebrate Species of Greatest Conservation Need that have both a significant association with forested ridge and swale and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of forested ridge and swale. ....	3-555
3-21. Vertebrate Species of Greatest Conservation Need that have both a significant association with Great Lakes beach and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Great Lakes beach. ....	3-562
3-22. Vertebrate Species of Greatest Conservation Need that have both a significant association with Great Lakes dune and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Great Lakes dune.....	3-567
3-23. Vertebrate Species of Greatest Conservation Need that have both a significant association with boreal forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of boreal forest. ....	3-582

Figure	Page
3-24. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern dry forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern dry forest. ....	3-589
3-25. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern dry-mesic forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern dry-mesic forest.....	3-597
3-26. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern hardwood swamp and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern hardwood swamp.....	3-605
3-27. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern mesic forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern mesic forest.....	3-614
3-28. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern wet forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern wet forest.....	3-624
3-29. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern wet-mesic forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern wet-mesic forest. ....	3-634
3-30. Vertebrate Species of Greatest Conservation Need that have both a significant association with cedar glade and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of cedar glade.....	3-644
3-31. Vertebrate Species of Greatest Conservation Need that have both a significant association with oak opening and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of oak opening. ....	3-651
3-32. Vertebrate Species of Greatest Conservation Need that have both a significant association with oak woodland and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of oak woodland. ....	3-659
3-33. Vertebrate Species of Greatest Conservation Need that have both a significant association with Central Sands pine – oak forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Central Sands pine – oak forest.....	3-666
3-34. Vertebrate Species of Greatest Conservation Need that have both a significant association with floodplain forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of floodplain forest. ....	3-675
3-35. Vertebrate Species of Greatest Conservation Need that have both a significant association with pine relict and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of pine relict .....	3-688

Figure	Page
3-36. Vertebrate Species of Greatest Conservation Need that have both a significant association with southern dry forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of southern dry forest.....	3-694
3-37. Vertebrate Species of Greatest Conservation Need that have both a significant association with southern dry-mesic forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of southern dry-mesic forest.....	3-703
3-38. Vertebrate Species of Greatest Conservation Need that have both a significant association with southern hardwood swamp and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of southern hardwood swamp.....	3-711
3-39. Vertebrate Species of Greatest Conservation Need that have both a significant association with southern mesic forest and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of southern mesic forest.....	3-718
3-40. Vertebrate Species of Greatest Conservation Need that have both a significant association with white pine – red maple swamp and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of white pine – red maple swamp. ....	3-730
3-41. Vertebrate Species of Greatest Conservation Need that have both a significant association with alder thicket and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of alder thicket.....	3-739
3-42. Vertebrate Species of Greatest Conservation Need that have both a significant association with bog relict and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of bog relict .....	3-746
3-43. Vertebrate Species of Greatest Conservation Need that have both a significant association with calcareous fen (southern) and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of calcareous fen (southern).....	3-756
3-44. Vertebrate Species of Greatest Conservation Need that have both a significant association with emergent aquatic and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of emergent aquatic.....	3-769
3-45. Vertebrate Species of Greatest Conservation Need that have both a significant association with emergent aquatic – wild rice and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of emergent aquatic – wild rice. ....	3-778
3-46. Vertebrate Species of Greatest Conservation Need that have both a significant association with ephemeral ponds and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of ephemeral ponds.....	3-786
3-47. Vertebrate Species of Greatest Conservation Need that have both a significant association with Great Lakes coastal fens and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of Great Lakes coastal fens.....	3-794

Figure	Page
3-48. Vertebrate Species of Greatest Conservation Need that have both a significant association with interdunal wetland and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of interdunal wetland. ....	3-800
3-49. Vertebrate Species of Greatest Conservation Need that have both a significant association with northern sedge meadow and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of northern sedge meadow.....	3-808
3-50. Vertebrate Species of Greatest Conservation Need that have both a significant association with open bog and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of open bog .....	3-818
3-51. Vertebrate Species of Greatest Conservation Need that have both a significant association with shrub-carr and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of shrub-carr .....	3-827
3-52. Vertebrate Species of Greatest Conservation Need that have both a significant association with southern sedge meadow and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of southern sedge meadow.....	3-835
3-53. Vertebrate Species of Greatest Conservation Need that have both a significant association with submergent aquatic and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of submergent aquatic. ....	3-843
3-54. Vertebrate Species of Greatest Conservation Need that have both a significant association with surrogate grasslands and a high probability of occurring in an Ecological Landscape(s) that represents a major opportunity for protection, restoration and/or management of surrogate grasslands.....	3-860
5-1. Monitoring within the adaptive management cycle.....	5-2
7-1. Wisconsin's strategy for adaptive management including the role of monitoring. ....	7-1
